This is an exciting opportunity to play an integral role in achieving the company's goals. Qualified candidates will bring a strong knowledge Software Development and problem solving skills to help us address our customer's needs.

- **Located in Kuala Lumpur**
- **Nominally 8:00 a.m. – 5:00 p.m. Monday - Friday (occasional night and weekend work required)**
- **Full-Time position**

The Company

Katalyst Data Management (KDM) is the global leader in hosted subsurface data management solutions for the oil and gas industry. From data capture and verification, to data storage and organisation, to marketing data online, our specialised data services cater to large multinational corporations, national governments and small independents. KDM's web-based iGlass services and their related controls, including system redundancy, are key differentiators in providing and maintaining high availability, 24/7 access for customers. Innovation and commitment has enabled KDM to provide excellence in both technologies and service qualities.

Key Responsibilities and Accountabilities

In this role you will provide support to international Operations through the development of new products and the enhancement and maintenance of existing products. Working under the technical guidance of the Chief Architect you will collaborate with business analysts, other developers, DBAs, and QA personnel. Great organisational ability, a high level of attention to detail, the ability to multi-task, a natural curiosity and a desire to learn are also required for this role.

Key Responsibilities:

- Design, build, deploy and maintain products that will grow the business
- Conduct unit and integration testing to ensure quality standards are met
- Communicate technical problems to peers, architect and project owner and provide recommendations for possible solutions
- Collaborate with peers and colleagues through active participation in design and code reviews

Skills Required:

- Strong knowledge of Java 11, JEE 7 (CDI, EJB 3+, JMS, JPA [Hibernate], JAX-RS)
- Strong knowledge of relational databases (Oracle 12c, Postgres)
- Strong knowledge of Linux
- Knowledge of Javascript and the React library
- Experience with unit testing (JUnit) and continuous integration (Jenkins)
- Experience with configuring build systems (Maven)
- Experience using Agile (Scrum) practices
- Experience with web & application server configuration & deployment (Apache HTTP Server, Tomcat, Wildfly) an asset
- Experience with web frameworks (Struts, Spring MVC) an asset
- Experience with configuration management tools (Ansible) an asset
- Experience with GIS and mapping systems (ESRI ArcGIS Server, FME Server) an asset
- Experience with NoSQL or full-text search technologies (ElasticSearch/Solr/Lucene) an asset
- Experience with seismic or well data and the PPDM data model an asset

Required Education and Experience

- 10+ years of relevant software Development experience
- Bachelor degree in software engineering, computer science or equivalent work experience
- Familiar with test Automation tools such as Selenium, IBM RFT.
- Knowledge or experience in Oil and Gas Exploration highly valued
- Knowledge of PPDM data model highly valued

Position Type and Expected Hours of Work:

This is a full-time position. As a full-time position, the Senior Software Developer is eligible to participate in the regional benefits offered to Katalyst employees.

Standard days and hours of work are Monday through Friday, 8:00 a.m. to 5:00 p.m., however, days may be flexed to communicate with our software development team in Kuala Lumpur, Malaysia. Occasional night and weekend hours are expected in support of our global operations.

Occasional regional and international travel may be required.

Applications can be emailed in confidence to jobs@katalystdm.com
