- **Full-Time position**

The Company

Katalyst Data Management (KDM) is the global leader in hosted subsurface data management solutions for the oil and gas industry. From data capture and verification, to data storage and organisation, to marketing data online, our specialised data services cater to large multinational corporations, national governments and small independents. KDM's web-based iGlass services and their related controls, including system redundancy, are key differentiators in providing and maintaining high availability, 24/7 access for customers. Innovation and commitment has enabled KDM to provide excellence in both technologies and service qualities.

Key Responsibilities and Accountabilities

As an Indexing Technician, you must possess exceptional attention to detail. The Indexing Technician is responsible for the capturing of meta-data of our client's subsurface data while meeting client requirements and specifications. In this role, you will be assigned jobs for various clients/regions and will be expected to catalogue the data using KDM workflows and processes.

Key Responsibilities:

- Index data using various KDM proprietary tools and software,
- Research seismic lines, wells and associated data within iGlass to identify/prevent duplication as per client profiles,
- Ability to recognize, validate and QC specific data formats such as SEG-Y, SEG-D, LAS and DLIS,
- Identify sources of spatial information and submit for loading to GIS team,
- Update Work Management Tool with comments and billing information for each job,
- Initiate communication with Account Managers and Archivers to solve problems related to data.

Skills Required:

- Highly proficient in oral and written communication proficiency in English.
- Interacts with people effectively. Co-operates within the group and across groups with a strong emphasis on teamwork.
- Strong analytical and technical computer skills with an emphasis on Microsoft Excel.
- Pays close attention to detail, accuracy, and completeness. Shows concern for all aspects of the job.
- Ability to work transparently with minimal supervision.
- Problem-solving skills

Knowledge Required:

- Knowledge of data management practices and standards specific to well and seismic data.
- Oil and Gas industry experience

Required Education and Experience

- High-school diploma or equivalent
- 2+ years seismic data experience
